Business Solutions Advantage.

Headquartered in Florida with offices in Weston and Tampa, Internet eBusiness Solutions (IES) is a leading Business Software Development, Systems Implementation, and Consulting firm dedicated to the Health Care, Distribution, Communications, Manufacturing, and Service industries.

Founded in 2000, IES is a Microsoft Gold Certified Partner and the recipient of Microsoft Manager's Excellence Award, the Microsoft President's Club, and was named as one of CRN Magazine's "Fast Growth 100 Companies" for 2006 and 2007. IES provides software and process solutions for the complete enterprise. The Microsoft Business Solutions product line consists of Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), and Professional Services Automation (PSA) solutions oriented and middle market. With these tools, IES provides growth companies with comprehensive business solutions for competing in today's international cutting edge economies.

IES is a total solutions provider deploying Microsoft Business Solutions with its team of consulting experts. IES is capable of implementing, customizing and supporting any software product in the MBS product line. Each of our consulting staff is an employee of IES and averages over 12 years of experience. Additionally, we employ a proprietary programming and development staff capable of tailoring out-of-the-box solutions to your specific business requirements. Following the implementation and customization of your enterprise systems, IES provides continuing professional support and development of all applications.

“Goodmark USA is smaller unit of Goodmark plc., a well established European design and manufacturing group, with sophisticated processing requirements such as multi-currency transaction processing and EDI. Although we are far from the largest IES account, we have instant access to any IES technician or manager. IES has proactively helped us with systems improvement suggestions throughout our 8+ year relationship. Great Plains and IES have been the cornerstones of our enterprise systems.”

Michael D. Rhodes, CFO
Goodmark USA

What our clients derive from IES is just what our corporate name says - a Solution. We work closely with our clients to understand what makes their businesses and work-flows unique. We incorporate their business culture into the Microsoft Dynamic solution we propose to instill ownership amongst the users, simplify integration and migration, facilitate training, and remain within time and monetary budget projections.

“We chose IES as our systems integrator based on their business competence and solid technical familiarity with GP. Since that time, our company has grown exponentially with global operations and support requirements. IES has shown us how to manage this growth by exploiting the control and reporting facilities within GP and providing expert customizations to tailor the software to our needs.”

Eyal Lalo, President
Invicta Watch Company

MICROSOFT COMPETENCIES

Competencies are a recognized level of technical and business expertise within a given area. To earn the Microsoft Business Solutions Competency, which indicates expertise on Microsoft Dynamics software and services, partners must meet specific professional certifications and provide customer references.

IES Business Solution's achievement of the Microsoft Business Solutions Competency further validates the company's expertise on Microsoft Dynamics software and services and provides IES with information, tools, and support focused specifically on developing, deploying and managing Microsoft Dynamics applications. These resources help IES serve customers more efficiently and create a foundation for longer-term, deeper relationships with them.

MICROSOFT GOLD CERTIFIED PARTNER ADVANTAGE

Of the hundreds of thousands of Microsoft partners worldwide, Microsoft Gold Certified Partners represent the highest level of competence and expertise with Microsoft technologies. Less than five percent of Microsoft Partners have earned the status of Gold Certified Partner, and IES Business Solutions is one of them. When you partner with IES, you can count on tremendous industry knowledge, valuable experience and exceptional service and support.

The IES difference.

There are a number of organizations that implement Microsoft Dynamics solutions. What sets IES apart are the confidence, competence and peace of mind it provides customers.

CONFIDENCE

When customers choose IES, they can be confident that their unique needs are understood and that the solution IES recommends holistically addresses customers' current and future needs. They can also be assured that implementation timeframes and proposed budgets are accurate and realized.

COMPETENCE

IES truly knows and understands the solutions it represents as well as how best the solutions can meet customers' unique circumstances. IES prides itself on building long-term relationships with its clients, and the end of the implementation is only the beginning. IES completes thorough training for all users and offers ongoing training and support.

PEACE OF MIND

When customers choose IES, they choose a long-term partner, not a one-time implementation provider. IES assures that the solutions, including any customizations, continue to operate efficiently and seamlessly through any solution upgrades.
